

DrX – Engineer's Investigation Kits

Applications:

The range of processes that may potentially benefit from improved monitoring, across various industries can be huge. In order to solve the problem of 'what to monitor', E2L provide a series of **'Engineers Investigation Kits'** for initial testing purposes.

These kits contain five different DrX detectors, complete with all necessary connectors, instructions, and on-site weatherproof tag labels. They provide the plant maintenance engineer with a range of modules for experimentation prior to committing larger scale distribution of any one particular module.

Different kits are available with different sets of DrX modules; their contents have been selected for the particular requirements of different disciplines. All engineer's investigation kits come in a lightweight weatherproof plastic moulded case for safe keeping.

Available Engineer's Investigation Kits:

Part No.	Name	Contents
P270-011-0	EIK-plant	Case with DrKnock, DrHiss, DrRumble, DrVibe, DrHeat
P270-011-1	EIK-process	Case with DrKnock, DrHiss, DrRumble, DrCool, DrHeat
P270-011-2	EIK-fluid	Case with DrHiss, DrFlow, DrHeat, Dr Cool, DrSonic
P270-011-4	EIK-assembly	Case with DrClick, DrSnap, DrKnock, DrSonic, DrHeat
